ABSTRACTED-PUB-NO: EP 874048A

## BASIC-ABSTRACT:

A human ''Desert hedgehog'' protein, DNA encoding the protein, a monoclonal antibody that recognises the protein, and a hybridoma that produces such an antibody, are new.

USE - The antibody can be used to detect or purify the protein. It is also stated that the protein, DNA and antibody are useful in the elucidation of hereditary morphological abnormalities in humans to establish their treatments and diagnoses.
